Submission Worksheet

Course: IT202-007-F2024
Assigment: [IT202] Module 4 Init DB Setup Checkpoint
Student: Michael P. (mcp62)

Submissions:

Submission Selection

1 Submission [submitted] 10/7/2024 11:59:44 PM

Instructions

^ COLLAPSE ^

Reminder: Make sure you start in dev and it's up to date

- git checkout dev
- git pull origin dev
- git checkout -b ProjectSetup

Steps:

1. Create a new folder in public_html called **Project** if it doesn't exist (however you call it be aware of case sensitivity)
2. create a new folder in Project called **sql**
3. Create a new file in sql called init_db.php
4. Paste the content from
   https://gist.github.com/MattToegel/6a8310e3ac19fe505870e5ebfa8cf4ea
   ◦ You will get errors if this is not in the proper location
5. Create another file in sql called 001_create_table_users.sql
6. Paste the content from
   https://gist.github.com/MattToegel/f3b39da97fba38bd04fc7073ad0a627e
7. Add/commit/push these to the new branch (if you haven't yet)
8. Create the pull request on github but do not complete it yet
9. Create a new folder in public_html called **M4**
10. Fill out the below deliverables and add the output PDF to the M4 folder 1. Note: You'll need to manually deploy ProjectSetup to heroku dev to capture some of the screenshots
11. Add/commit/push the new changes
12. Verify all of the files appear as expected in the ProjectSetup branch 1. M4/m4_submission.md (note M4 is not in Project, but in public_html) 2. Project/sql/init_db.php 3.

Project/sql/001_create_table_users.sql
13. Complete the merge/pull request from step 8
14. Create a new pull request from dev to prod and complete it
15. Go back to your local repo
16. git checkout dev
17. git pull origin dev
18. Upload the same output PDF to Canvas

Branch name: ProjectSetup

Task

100%

Group: Verify Setup
Task #1: Verify Heroku Dev Deployment by visiting the path to init_db.php
Weight: ~50%
Points: ~3.00

^ COLLAPSE ^

Checklist   *The checkboxes are for your own tracking

#	Details
☐ #1	Shows 001_create_table_user.sql status as success or blocked (any other output is likely an error). Blocked is fine as it just means it ran correctly once before and the script is saving a wasted DB call.
☐ #2	URL clearly shows it's from Heroku dev (which should also include the UCID)

ⓘ Details:

Note: You'll need to manually deploy this branch to Heroku Dev and then manually navigate to the correct path.
If steps were followed correctly the path should be /Project/sql/init_db.php

Task #2: Verify DB changes via MySQL Extension
Weight: ~50%
Points: ~3.00

∧ COLLAPSE ∧

Checklist	*The checkboxes are for your own tracking

| #	Details
☐ #1	Screenshot the left panel that opens showing your DB connection with your UCID as the DB name and with the tables expanded showing the table was created.
☐ #2	Clearly shows generated table name with columns (there likely won't be data and this is ok). This will include the main content area that's populated when a table is inspected

ⓘ **Details:**

Note: If you ran things correctly and don't see the table after fully expanding the hierarchy you may need to click one of the refresh icons in the MySQL Extension side panel.

Task #1: Reflect on learning
Weight: ~33%
Points: ~1.33

^ COLLAPSE ^

Checklist   *The checkboxes are for your own tracking

#	Details
☐ #1	Significant response (few sentences). (i.e., can discuss the purpose and usage of init_db.php)

≡ Task Response Prompt

Response:

I did all of this in class but i was able to set up the connection merge to dev, and will then be merging to prod, it is intersting to see how the paths work and how you can deploy and run things on heroku.

Task #2: Reflect on challenges/experience
Weight: ~33%
Points: ~1.33

^ COLLAPSE ^

Checklist   *The checkboxes are for your own tracking

#	Details
☐ #1	Response is a discussion about an actual issue/experience
☐ #2	If an issue was mentioned, it was resolved or at least reached out about and pending a resolution. (Should really be resolved by time of submission)

≡ Task Response Prompt

Response:

there werent any difficulties if anything i contacted the proffessor to see which step if any i needed to pick up on, only

there weren't any difficulties if anything I contacted the professor to see which step if any I needed to pick up on, only thing was needing to chnage the sql folder name becasue the pathing is case sensitive

Task #3: Heroku and Pull Request Links
Weight: ~33%
Points: ~1.33

^ COLLAPSE ^

Checklist   *The checkboxes are for your own tracking

#	Details
☐ #1	Include pull request link for this assignment (should end with /pull/#)
☐ #2	Include a link to the init_db.php file on Heroku Prod. Note: during submission this is an anticipated URL that will only work once everything is done and the final dev->prod pull request is complete.
